NONPROFIT SUB-SECTORS

Community nonprofits are independent of government and produce goods and services for free or at prices substantially lower than the cost of production. Examples include food banks, shelters, youth groups, places of worship, advocacy organizations, and service clubs.

Business nonprofits are also independent of government and primarily sell goods and services at prices that usually cover the cost of production. Examples include business associations, chambers of commerce, and condominium associations.

Government nonprofits are funded and overseen by government, but institutionally distinct. They frequently collect some fees, but these are well below the cost of production. Examples include hospitals, some care facilities, universities, and colleges.

REVENUE BY SUB-SECTORⁱⁱ

Earned income includes sales of goods and services, memberships, and investments. *Government* reports income from all levels of government. *Donations* consists of donations from individual Canadians and *Businesses / NPOs* captures corporate donations and inter-sub-sector transfers between nonprofit organizations.

WOMEN+ ^{viii}
